Executive Board

CF/HST/1985-034/Anx.03/06/Cor.01

CHILDREN IN NATIONAL DEVELOPMENT

Notes and Recommendations by the Executive Director

Corrigendum

Page 10, graph: "United States of America"

The following data should replace the corresponding data in the graph:

Live births	100%
Enter grade 1 <sup>a/</sup>	96
Complete grade 8 (elementary)	89
Enter grade 9 <sup>a/</sup>	82
Complete grade 12	63

<sup>a/</sup> The percentage entering grade 1 and grade 9 is based on the percentage completing these grades.

Note: These data, which were prepared by the United States Department of Health, Education and Welfare, were submitted by the United States representative to the Executive Board of UNICEF after the publication of document E/ICEF/448. They show a higher level of attainment than do the data given in the graph, since they are based on census data of population reaching various educational levels, while the data given in E/ICEF/448 are based on school enrolment statistics, which are subject to error, owing to the high "left-back" rate in the early school years.
